A CONCERN OF **AMCO GROUP**

FROM THE OFFICE OF THE FOUNDER

Dear Valued Students, Partners, Clients, and Well-Wishers,

Welcome to AMCO Skill Bangladesh Ltd. (ASB).

Bangladesh is home to over 177 million people—a nation rich in potential, yet faced with heavy economic challenges where millions of energetic young people struggle with unemployment and a lack of job opportunities. For decades, millions from our country have gone abroad as basic, unskilled labor—working in demanding jobs like basic cleaning without formal training, certifications, or professional respect.

Seeing this reality, I knew we had to change the narrative. Our people are not a burden—they are the biggest asset of Bangladesh. With over 170 million lives, our human capital possesses the determination to shape and change the global market. All they need is the right guidance, hands-on training, and dynamic skills development.

ASB was born out of this conviction: to convert jobless, unskilled individuals into certified, highly skilled, and internationally respected professionals. When a jobless individual receives professional training and secures a position—whether in Bangladesh or overseas—everything shifts. Their life changes, their family's financial security is transformed, and their children gain a better future. Furthermore, when skilled workers go abroad, they command higher salaries and send home substantial remittances, creating a vital economic foundation that powers our nation forward.

To turn this vision into reality, we built one of the largest and most advanced ISO-certified skill development hubs in the country, spanning over 50,000 sq ft. Our campus features modern equipment, specialized practical training bays across various technical departments, and a 500-bed residential facility with complete food and accommodation services, enabling students to focus entirely on their personal transformation.

We hold ourselves to international benchmarks, backed by accreditations and certifications from ISO 9001:2015, TQCSI, UKAS, JAS-ANZ, BTEB, NSDA, and BMET. Every year, our goal is to empower and deploy over 10,000 highly trained professionals across the GCC and global markets.

With warm regards:

Mohammad Anamul Hoque

Founder -AMCO GROUP

PRINCIPAL'S MESSAGE

Welcome to AMCO Skill Bangladesh Ltd. (ASB).

Bangladesh is a nation rich in human potential, yet millions of young people still face unemployment, limited opportunities and a lack of professional skills. For years, many Bangladeshis have travelled overseas as unskilled or semi-skilled workers without proper training, certification and professional recognition. I believe our people are not a burden—they are Bangladesh's greatest asset. With the right guidance, practical training and skills development, our workforce can compete successfully in the global market.

ASB was founded with a clear vision: to transform unskilled and unemployed individuals into certified, skilled and internationally respected professionals. When a person gains valuable skills and employment, the positive impact reaches their family and contributes to the economic strength of Bangladesh.

To support this vision, we have developed a **50,000+ sq. ft. ISO-certified skills development campus** with modern equipment, specialized practical training facilities and a 500-bed residential facility with food and accommodation services. Our programs are supported by **ISO 9001:2015, TQCSI, UKAS, JAS-ANZ, BTEB, NSDA and BMET**, with a vision to empower and deploy 10,000+ skilled professionals annually across the GCC and global markets.

Our specialized skill pathways include Cleaning & Facilities Management, Welding & Fabrication, Civil Construction, and MEP & Electro-Mechanical, covering key trades such as **housekeeping, cleaning, 1G-6G welding, pipe fabrication, masonry, carpentry, painting, scaffolding, electrical, HVAC, plumbing, fire safety, CCTV and solar technology.**

To our global recruiters and industry partners, ASB is committed to providing disciplined, safety-conscious and job-ready professionals prepared for real workplace requirements. To our trainees and jobseekers, ASB is more than a training centre—it is a pathway to skills, confidence, dignity, financial independence and global opportunity.

Together, we are transforming lives, creating opportunities and building a Skilled Bangladesh.

Warm regards,

Engr. Abu Bakar Siddique

Principal, AMCO Skill Bangladesh Ltd.

AMCO SKILL BANGLADESH

Who are we

- **AMCO Skill Bangladesh Ltd. (ASB)** is a professional technical and vocational training institution focused on developing job-ready skilled professionals.
- Our **50,000+ sq. ft. dedicated training campus** offers modern facilities, practical workshops and a professional learning environment.
- We deliver industry-focused training across **15+ departments**, covering technical, construction, hospitality, facility management and professional skills.
- Our integrated facilities enable trade testing for **500+ candidates per day**, along with practical training, employer interviews and workforce assessment.
- We prepare competent and confident professionals for employment opportunities across Bangladesh, the GCC and international markets.

AMCO SKILL BANGLADESH LTD.

We prepare candidates with the skills, knowledge, and workplace readiness needed for today's job market. Our practical training helps build confident, competent, and career-ready professionals for global opportunities.

OUR VISION

To become a leading and trusted hub for technical skills, vocational education and workforce development, empowering individuals with the practical knowledge, professional competence and confidence needed to build successful and sustainable careers. We envision an inclusive learning environment where young people can discover their potential, develop industry-relevant skills and transform their aspirations into meaningful opportunities. Through continuous innovation, quality education and international exposure, we aspire to contribute to the development of a skilled, productive and globally competitive workforce while creating greater opportunities for Bangladeshi talent in local and international markets.

OUR MISSION

To provide high-quality, practical and industry-focused technical and vocational training that transforms learners into competent, confident and job-ready professionals. We are committed to combining experienced instructors, modern training facilities, practical workshops, competency-based learning and industry-oriented programs to develop skills that meet real workplace requirements. Our mission is to strengthen employability, promote professional excellence, workplace safety and ethical standards while supporting individuals in building sustainable careers. Through skills assessment, trade testing, career guidance and industry collaboration, we aim to create meaningful pathways to employment in Bangladesh and international markets, particularly across growing technical and industrial sectors.

OUR STRATEGY

To drive sustainable skills development through practical training, modern technology, global standards, quality assurance and strong industry partnerships. We focus on continuous improvement, skills assessment, trade testing and workforce preparation to build a clear pathway from training to competency, competency to employment, and employment to long-term professional growth.

TRAINING DEPARTMENT

WELDING

Practical Welding Training for Industry-Ready Professionals

Our Welding training focuses on practical skills, safety, quality and workplace readiness, preparing candidates for professional opportunities in local and international markets.

INDUSTRY
STANDARD

MODERN
EQUIPMENT

PRACTICAL
ASSESSMENT

GLOBAL
CAREERS

KEY HIGHLIGHTS

- Candidates learn SMAW, GTAW/TIG, GMAW/MIG and FCAW welding processes through practical training.
- Training covers 1G to 6G welding positions, helping candidates develop skills for different workplace requirements.
- Practical sessions focus on welding techniques, joint preparation, electrode handling, gas cutting and equipment operation.
- Candidates receive hands-on experience with professional welding machines, tools and safety equipment.
- Strong emphasis on PPE, fire prevention, equipment handling and safe working procedures.
- Trainers provide practical guidance to improve welding technique, accuracy and overall performance.
- Candidates participate in practical tests and trade assessments to evaluate their welding skills and workplace readiness.
- Training prepares candidates for opportunities in construction, fabrication, manufacturing, Oil & Gas and industrial projects.

From Practical Training to Global Professional Skills.

TRAINING DEPARTMENT

FABRICATION

Practical Metal Fabrication Training for Industry-Ready Professionals

Our Fabrication training focuses on practical skills in metal cutting, fitting, assembly and fabrication, helping candidates develop the technical ability, safety awareness and workplace readiness required for industrial and construction environments.

INDUSTRY
STANDARD

MODERN
EQUIPMENT

PRACTICAL
ASSESSMENT

GLOBAL
CAREERS

KEY HIGHLIGHTS

- Candidates develop practical skills in metal cutting, fitting, measurement and fabrication using appropriate tools and equipment.
 - Training covers pipe fabrication, structural fabrication, joint preparation and component assembly through practical workshop activities.
 - Candidates learn to read basic technical drawings and follow accurate measurement, alignment and fabrication procedures.
 - Practical sessions include cutting, grinding, drilling, fit-up, positioning and assembly of metal components.
 - Strong emphasis on PPE, safe tool handling, workplace safety and proper fabrication procedures.
 - Candidates gain hands-on experience working with industrial tools, machines and fabrication equipment.
 - Practical assessments help evaluate technical ability, accuracy and workplace readiness.
 - Training prepares candidates for opportunities in construction, structural fabrication, industrial projects, Oil & Gas and manufacturing.

From Practical Training to Global Professional Skills.

TRAINING DEPARTMENT

MACHINING & MECHANICAL

Practical Training in Machining, Machine Operation & Mechanical Skills

Our Machining & Mechanical training focuses on practical skills, technical knowledge, safe work practices and hands-on experience, preparing candidates for modern industrial and mechanical workplaces.

INDUSTRY
STANDARD

MODERN
EQUIPMENT

PRACTICAL
ASSESSMENT

GLOBAL
CAREERS

KEY HIGHLIGHTS

- Candidates develop practical skills in machining, machine operation, mechanical fitting and workshop practices.
- Training introduces candidates to lathe machines, industrial tools, equipment, materials and basic machining techniques.
- Practical sessions include measuring, cutting, turning, fitting, assembly and machine operation with attention to accuracy and workmanship.
- Candidates gain experience in understanding technical drawings, measurements and basic mechanical procedures relevant to workplace requirements.
- Strong attention is given to PPE, equipment handling, workplace safety and responsible working practices throughout the training.
- Experienced trainers provide practical guidance and feedback to help candidates improve their technical ability and confidence.
- Candidates participate in hands-on exercises, practical assessment and trade testing to evaluate their skills and job readiness.
- Training prepares candidates for opportunities in machining, mechanical workshops, industrial maintenance, Oil & Gas and manufacturing.

From Practical Training to Global Professional Skills.

TRAINING DEPARTMENT

HVAC SERVICES

HVAC, Refrigeration & Air Conditioning Skills Training

Our HVAC training develops practical skills in air conditioning, refrigeration, ventilation and ducting systems, combining hands-on practice, technical knowledge and safety awareness for commercial, residential and industrial environments.

**INDUSTRY
STANDARD**

**MODERN
EQUIPMENT**

**PRACTICAL
ASSESSMENT**

**GLOBAL
CAREERS**

KEY HIGHLIGHTS

- Practical training in air conditioning, refrigeration, ventilation and HVAC system installation.
- Candidates learn basic HVAC components, tools, equipment and operating procedures through hands-on training.
- Training covers duct fabrication, installation, insulation and air distribution systems for different applications.
- Candidates develop practical knowledge of AC units, refrigeration systems, ventilation equipment and related components.
- Practical sessions include installation, servicing, maintenance and troubleshooting under supervised workshop conditions.
- Training introduces basic HVAC layouts, technical drawings and system installation procedures.
- Candidates learn proper procedures for equipment handling, maintenance and safe working practices.
- Strong emphasis on PPE, electrical safety, refrigerant safety and workplace hazard awareness.
- Candidates gain practical experience through realistic HVAC setups and supervised technical activities.
- Training prepares candidates for opportunities in HVAC, refrigeration, facility management, construction and building services.

From Practical Training to Global Professional Skills.

TRAINING DEPARTMENT

MASONRY TRAINING

Practical Training for Skilled Masonry & Construction Professionals

Our Masonry Training develops job-ready skills in brickwork, blockwork, plastering and concrete works, with hands-on practice focused on quality, safety and practical construction standards.

INDUSTRY
STANDARD

MODERN
EQUIPMENT

PRACTICAL
ASSESSMENT

GLOBAL
CAREERS

KEY HIGHLIGHTS

- Practical training in brick masonry, block masonry and concrete masonry for residential, commercial and infrastructure projects.
- Hands-on practice in wall construction, partition work, foundations and general masonry applications.
- Training in plastering, rendering, screeding and surface finishing to achieve accurate and quality workmanship.
- Candidates learn proper mortar mixing, material handling, alignment, leveling, measurement and setting-out techniques.
- Practical instruction in reading and following construction drawings, dimensions and site specifications.
- Strong emphasis on quality control, accuracy, productivity and proper construction methods.
- Comprehensive training in workplace safety, PPE, safe tool handling and responsible site practices.
- Candidates participate in practical exercises and skill assessments to evaluate their technical competency and job readiness.
- Training prepares candidates for opportunities as Masons, Bricklayers and General Construction Workers in local and international construction markets.

From Practical Training to Global Professional Skills.

TRAINING DEPARTMENT

STEEL FIXER TRAINING

Practical Training for Skilled Steel Fixers & Reinforcement Professionals

Our Steel Fixer Training develops job-ready skills in rebar cutting, bending, tying and reinforcement installation, with hands-on practice focused on accuracy, structural requirements, safety and quality workmanship.

INDUSTRY
STANDARD

MODERN
EQUIPMENT

PRACTICAL
ASSESSMENT

GLOBAL
CAREERS

KEY HIGHLIGHTS

- Practical training in rebar cutting, bending, tying and fixing for residential, commercial and large-scale infrastructure construction projects.
- Hands-on practice in reinforcement works for columns, beams, slabs, foundations and other reinforced concrete structures.
- Training in bar spacing, alignment, positioning and concrete cover to ensure accurate reinforcement and quality structural workmanship.
- Candidates learn proper steel measurement, bar marking, cutting, bending and material handling according to construction requirements.
- Practical instruction in reading and following reinforcement drawings, bar bending schedules, dimensions and site specifications.
- Strong emphasis on accuracy, structural requirements, productivity and professional steel fixing methods for construction projects.
- Comprehensive training in workplace safety, PPE, safe tool handling and proper lifting and handling of reinforcement materials.
- Candidates participate in practical exercises and skill assessments to evaluate their technical competency, accuracy and job readiness.
- Training prepares candidates for opportunities as Steel Fixers, Rebar Workers and Reinforcement Workers in local and international construction markets.

From Practical Training to Global Professional Skills.

TRAINING DEPARTMENT

CARPENTER TRAINING

Practical Training for Skilled Carpenters & Formwork Professionals

Our Carpenter Training develops job-ready skills in general carpentry, shuttering and formwork, measurement, cutting and assembly, with hands-on practice focused on accuracy, quality workmanship and construction safety.

INDUSTRY
STANDARD

MODERN
EQUIPMENT

PRACTICAL
ASSESSMENT

GLOBAL
CAREERS

KEY HIGHLIGHTS

- Practical training in general carpentry, shuttering and formwork for residential, commercial and infrastructure construction projects.
- Hands-on practice in measuring, marking, cutting, assembling and installing wooden and formwork structures according to site requirements.
- Training in shuttering works for columns, beams, slabs, foundations and other concrete structures with proper alignment and support.
- Candidates learn proper use of carpentry tools, material selection, measurement and cutting techniques for accurate construction work.
- Practical instruction in reading and following construction drawings, dimensions, levels and site specifications.
- Training in doors, frames, partitions and other general carpentry applications used in construction and building projects.
- Strong emphasis on accuracy, finishing quality, productivity and proper carpentry methods for professional site work.
- Comprehensive training in workplace safety, PPE, safe tool handling and proper material handling practices.
- Candidates participate in practical exercises and skill assessments to evaluate their technical competency and job readiness.

From Practical Training to Global Professional Skills.

TRAINING DEPARTMENT

SCAFFOLDING

Practical Training for Safe & Skilled Construction Professionals

Our Scaffolding training focuses on developing practical skills in scaffold erection, dismantling, inspection and safe working practices, preparing candidates for construction and industrial environments.

INDUSTRY
STANDARD

MODERN
EQUIPMENT

PRACTICAL
ASSESSMENT

GLOBAL
CAREERS

KEY HIGHLIGHTS

- Practical training in scaffold erection, dismantling, inspection and maintenance procedures for construction and industrial environments.
- Training covers different scaffolding components, structures, support systems and installation methods used in construction projects.
- Candidates learn proper assembly, alignment, securing and safe installation techniques according to workplace requirements.
- Practical sessions include working at height, fall prevention, access systems and safe scaffolding procedures.
- Candidates develop skills in selecting and assembling appropriate scaffolding components for different work requirements.
- Training emphasizes PPE, equipment handling, workplace safety and hazard awareness throughout practical sessions.
- Candidates learn proper procedures for scaffold inspection, stability checks and safe working conditions.
- Practical assessments help evaluate candidates' technical skills, accuracy and workplace readiness.
- Training prepares candidates for opportunities in construction, industrial maintenance, infrastructure and building projects.

From Practical Training to Global Professional Skills.

TRAINING DEPARTMENT

GYPSUM TRAINING

Practical Training for Skilled Gypsum & Interior Finishing Professionals

Our Gypsum Training develops job-ready skills in gypsum board installation, false ceilings, partition systems and interior finishing, with hands-on practice focused on accuracy, quality workmanship and construction safety.

INDUSTRY
STANDARD

MODERN
EQUIPMENT

PRACTICAL
ASSESSMENT

GLOBAL
CAREERS

KEY HIGHLIGHTS

- Practical training in gypsum board installation, false ceilings and partition systems for residential, commercial and interior projects.
- Hands-on practice in measuring, marking, cutting and installing gypsum boards according to drawings and site requirements.
- Training in ceiling frameworks, wall partitions, suspended ceilings and decorative gypsum applications.
- Candidates learn proper material selection, joint treatment, leveling, alignment and finishing techniques.
- Practical instruction in reading and following interior drawings, dimensions, layouts and construction specifications.
- Strong emphasis on accuracy, smooth finishing, quality workmanship and efficient installation methods.
- Comprehensive training in workplace safety, PPE, safe tool handling and proper material handling practices.
- Candidates participate in practical exercises and skill assessments to evaluate their technical competency and job readiness.
- Training prepares candidates for opportunities as Gypsum Installers, Ceiling Installers and Interior Finishing Workers in local and international markets.

From Practical Training to Global Professional Skills.

TRAINING DEPARTMENT

ELECTRICAL TRAINING

Practical Training for Skilled Electrical Installation Professionals

Our Electrical Training develops job-ready skills in electrical installation, wiring, maintenance and basic troubleshooting, with hands-on practice focused on safety, accuracy, quality workmanship and industry standards.

INDUSTRY
STANDARD

MODERN
EQUIPMENT

PRACTICAL
ASSESSMENT

GLOBAL
CAREERS

KEY HIGHLIGHTS

- Practical training in electrical wiring, installation and maintenance for residential, commercial and industrial construction projects.
- Hands-on practice in cable installation, conduit work, wiring systems and electrical connections according to site requirements.
- Training in switches, sockets, distribution boards, lighting systems and basic electrical control components.
- Candidates learn proper cable selection, circuit identification, termination, testing and safe electrical installation techniques.
- Practical instruction in reading and following electrical drawings, wiring diagrams, layouts and technical specifications.
- Training in basic electrical testing, fault identification and troubleshooting to develop practical problem-solving skills.
- Strong emphasis on electrical safety, PPE, safe tool handling, isolation procedures and workplace safety practices.
- Candidates participate in practical exercises and skill assessments to evaluate their technical competency and job readiness.
- Training prepares candidates for opportunities as Electricians, Electrical Installers and Electrical Maintenance Workers in local and international markets.

From Practical Training to Global Professional Skills.

TRAINING DEPARTMENT

PAINTING TRAINING

Practical Training for Professional Building & Industrial Painting

Our Painting training focuses on practical skills in building surface preparation, wall painting, spray application, industrial coating and professional finishing for construction and industrial environments.

INDUSTRY
STANDARD

MODERN
EQUIPMENT

PRACTICAL
ASSESSMENT

GLOBAL
CAREERS

KEY HIGHLIGHTS

- Practical training in building wall preparation, surface treatment and professional painting techniques for construction projects.
 - Training covers cleaning, sanding, scraping and proper surface preparation before applying paint and coatings.
 - Candidates learn primer application, coating preparation and professional painting procedures for different surfaces.
 - Practical sessions include brush, roller and spray painting techniques for residential, commercial and industrial buildings.
- Training covers normal and spray building painting applications with proper finishing and application methods.
- Candidates learn the correct use of painting tools, equipment, materials and professional application techniques.
- Industrial painting includes protective and decorative coatings for industrial structures, equipment and machinery.
- Practical exercises focus on smooth application, proper coverage and achieving consistent professional finishing quality.
- Training develops practical skills in colour matching, blending and creating uniform surface finishes.
- Strong emphasis on PPE, ventilation, material handling and safe painting practices throughout practical sessions.

From Practical Training to Global Professional Skills.

TRAINING DEPARTMENT

LOGISTICS & WAREHOUSE

Practical Training for Professional Logistics & Warehouse Operations

Our Logistics & Warehouse training focuses on practical skills in inventory management, stock handling, receiving, dispatching, storage and warehouse operations for modern supply chain environments.

INDUSTRY
STANDARD

MODERN
EQUIPMENT

PRACTICAL
ASSESSMENT

GLOBAL
CAREERS

KEY HIGHLIGHTS

- Practical training in warehouse operations, stock handling and inventory management for modern logistics and supply chain environments.
- Training covers receiving, checking, storing and dispatching goods using organized procedures for efficient warehouse operations.
- Candidates learn stock control, inventory records and accurate documentation to maintain proper warehouse information and accountability.
- Practical sessions include warehouse organization, product identification and efficient storage methods for different types of materials.
- Training develops skills in goods receiving, material handling and proper stock arrangement procedures within professional warehouse environments.
- Candidates learn procurement procedures, purchasing processes and basic supply management practices supporting daily logistics operations.
- Practical exercises focus on stock accuracy, documentation, organization and efficient warehouse management for improved operational performance.
- Training introduces store management software and digital inventory methods for effective stock monitoring and warehouse control.
- Strong emphasis on workplace safety, proper material handling and organized warehouse practices throughout practical training activities.
- Trainees gain hands-on experience through practical warehouse, inventory and store management activities under instructor supervision.

From Practical Training to Global Professional Skills.

TRAINING DEPARTMENT

SECURITY SERVICES

Practical Training for Professional Security Personnel

Our Security Services training focuses on security procedures, surveillance, emergency response, safety awareness and professional conduct for corporate, industrial, commercial and public environments.

INDUSTRY
STANDARD

MODERN
EQUIPMENT

PRACTICAL
ASSESSMENT

GLOBAL
CAREERS

KEY HIGHLIGHTS

- Practical training in professional security procedures, safety protocols and workplace security operations for corporate, industrial and commercial environments.
- Training covers access control, surveillance, observation and protection procedures for safeguarding people, property and valuable assets.
- Candidates develop effective communication, reporting and professional conduct skills required for responsible security service operations.
- Practical sessions include emergency response, incident handling and basic safety procedures for different workplace situations.
- Training develops situational awareness, hazard identification and responsible decision-making skills for professional security environments.
- Candidates learn the proper use of communication devices, security equipment and essential workplace safety tools during practical activities.
- Practical exercises focus on alertness, discipline, observation and effective response techniques through realistic workplace security scenarios.
- Training emphasizes PPE, emergency preparedness, safe working procedures and professional security standards throughout practical sessions.
- Trainees gain hands-on experience through supervised security exercises and realistic workplace situations under experienced instructors.

From Practical Training to Global Professional Skills.

TRAINING DEPARTMENT

HOUSEKEEPING

Practical Training for Professional Facility Management Services

Our Housekeeping training develops practical skills in room preparation, cleaning, linen handling, hygiene and guest-service procedures for hotels, hospitals and professional hospitality environments.

INDUSTRY
STANDARD

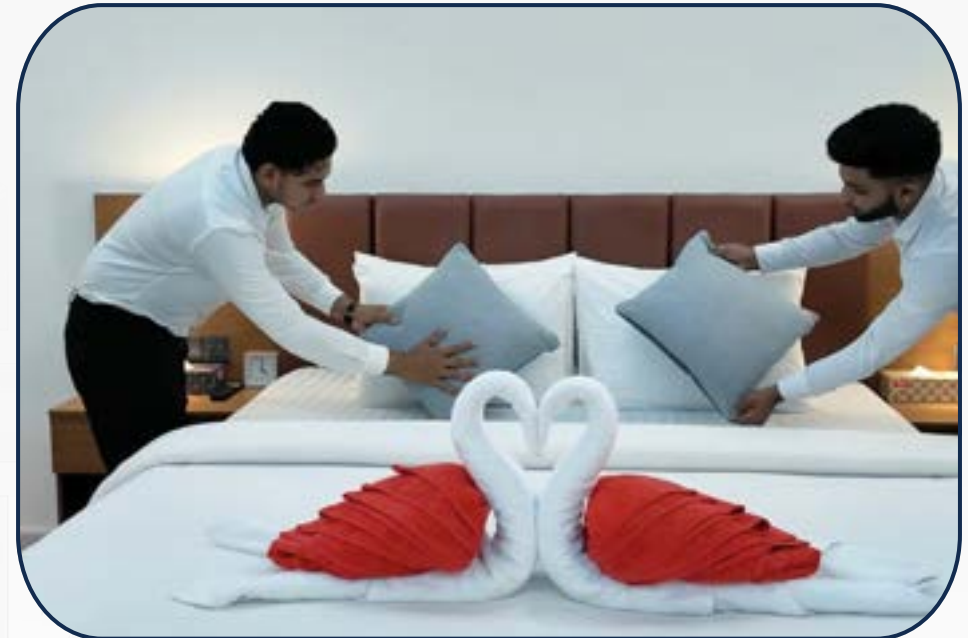

MODERN
EQUIPMENT

PRACTICAL
ASSESSMENT

GLOBAL
CAREERS

KEY HIGHLIGHTS

- Professional Room Preparation — Practical training in room setup, bed making, amenities arrangement and guest-ready presentation.
- Cleaning & Hygiene Standards — Training in professional cleaning procedures, sanitation, hygiene and workplace cleanliness.
- Linen & Laundry Handling — Proper handling, sorting, changing and storage of bed linen, towels and housekeeping supplies.
- Guest Service Procedures — Developing professional skills in guest assistance, communication and service etiquette.
- Housekeeping Tools & Equipment — Hands-on practice with standard cleaning tools, equipment and housekeeping materials.
- Hotel & Hospitality Operations — Practical exposure to housekeeping procedures followed in hotels and professional hospitality environments.
- Safety & Chemical Handling — Training in safe cleaning practices, PPE use and proper handling of cleaning materials.
- Workplace Readiness — Preparing candidates for housekeeping roles in hotels, hospitals and other professional facilities.

From Practical Training to Global Professional Skills.

TRAINING DEPARTMENT

CLEANING SERVICES

Practical Training for Professional Cleaning & Hygiene Services

Our Cleaning Services training focuses on professional cleaning techniques, hygiene standards, chemical handling and facility cleaning procedures for commercial buildings, hotels, hospitals and other professional environments.

INDUSTRY
STANDARD

MODERN
EQUIPMENT

PRACTICAL
ASSESSMENT

GLOBAL
CAREERS

KEY HIGHLIGHTS

- Practical training in professional cleaning methods, hygiene standards and facility maintenance procedures for different workplace environments.
- Training covers commercial buildings, hotels, hospitals and institutional cleaning operations using professional service procedures.
- Candidates learn floor cleaning, glass cleaning, window washing and carpet care techniques for different surfaces.
- Practical sessions include washroom cleaning, sanitation and hygiene management following proper workplace standards.
- Training develops skills in cleaning chemical selection, dilution, application and safe handling procedures.
- Candidates learn proper use of professional cleaning tools, machines, equipment and cleaning materials during practical sessions.
- Practical exercises focus on efficient cleaning, proper coverage, presentation and consistent service quality across facilities.
- Training includes industrial kitchen cleaning, hygiene control and sanitation practices for commercial service environments.
- Strong emphasis on PPE, chemical safety, hygiene protocols and safe working procedures throughout training activities.
- Trainees gain hands-on experience through supervised cleaning activities in realistic facility and workplace environments.

From Practical Training to Global Professional Skills.

TRAINING DEPARTMENT

FOOD & BEVERAGE

Practical Training for Skilled Hospitality & Food Service Professionals

Our Food & Beverage Training develops job-ready skills in food preparation, beverage service, restaurant operations and customer service, with hands-on practice focused on hygiene, quality and professional hospitality standards.

INDUSTRY
STANDARD

MODERN
EQUIPMENT

PRACTICAL
ASSESSMENT

GLOBAL
CAREERS

KEY HIGHLIGHTS

- Practical training in food preparation, kitchen operations and basic food service for hotels, restaurants, cafés and catering establishments.
- Hands-on practice in food handling, preparation techniques, portion control and professional presentation according to industry requirements.
- Training in restaurant service, table setup, order taking and professional guest service to deliver a quality dining experience.
- Candidates learn proper food hygiene, sanitation, personal grooming and safe food-handling practices in hospitality environments.
- Practical training in beverage preparation and service, including hot and cold beverages and basic café operations.
- Instruction in menu knowledge, customer communication, order coordination and professional service techniques.
- Strong emphasis on quality, hygiene, efficiency, teamwork and professional hospitality standards.

OUR GROWING CAPABILITIES

AMCO SKILL – FROM TRAINING TO GLOBAL OPPORTUNITY

AMCO Skill Bangladesh (ASB) is developing a complete skills-to-employment ecosystem that combines practical training, competency assessment, trade testing and workforce preparation for Bangladesh and international employment markets. With our 50,000+ sq. ft. training facility, 50+ career-focused courses, practical workshops and large-scale testing facilities, we are continuously expanding our capacity to prepare competent, disciplined and job-ready professionals.

Program Structure and Offerings

Four-Week and Six-Week Programs:

Each program is tailored to meet industry-specific needs.

01 – TRAIN

Practical, hands-on training using dedicated workshops, labs, tools and industry-focused learning methods.

02 – ASSESS

Evaluate technical competency through practical exercises, skills assessment and structured trade testing.

03 – PREPARE

Develop workplace readiness through safety awareness, discipline, communication and professional skills.

04 – CONNECT

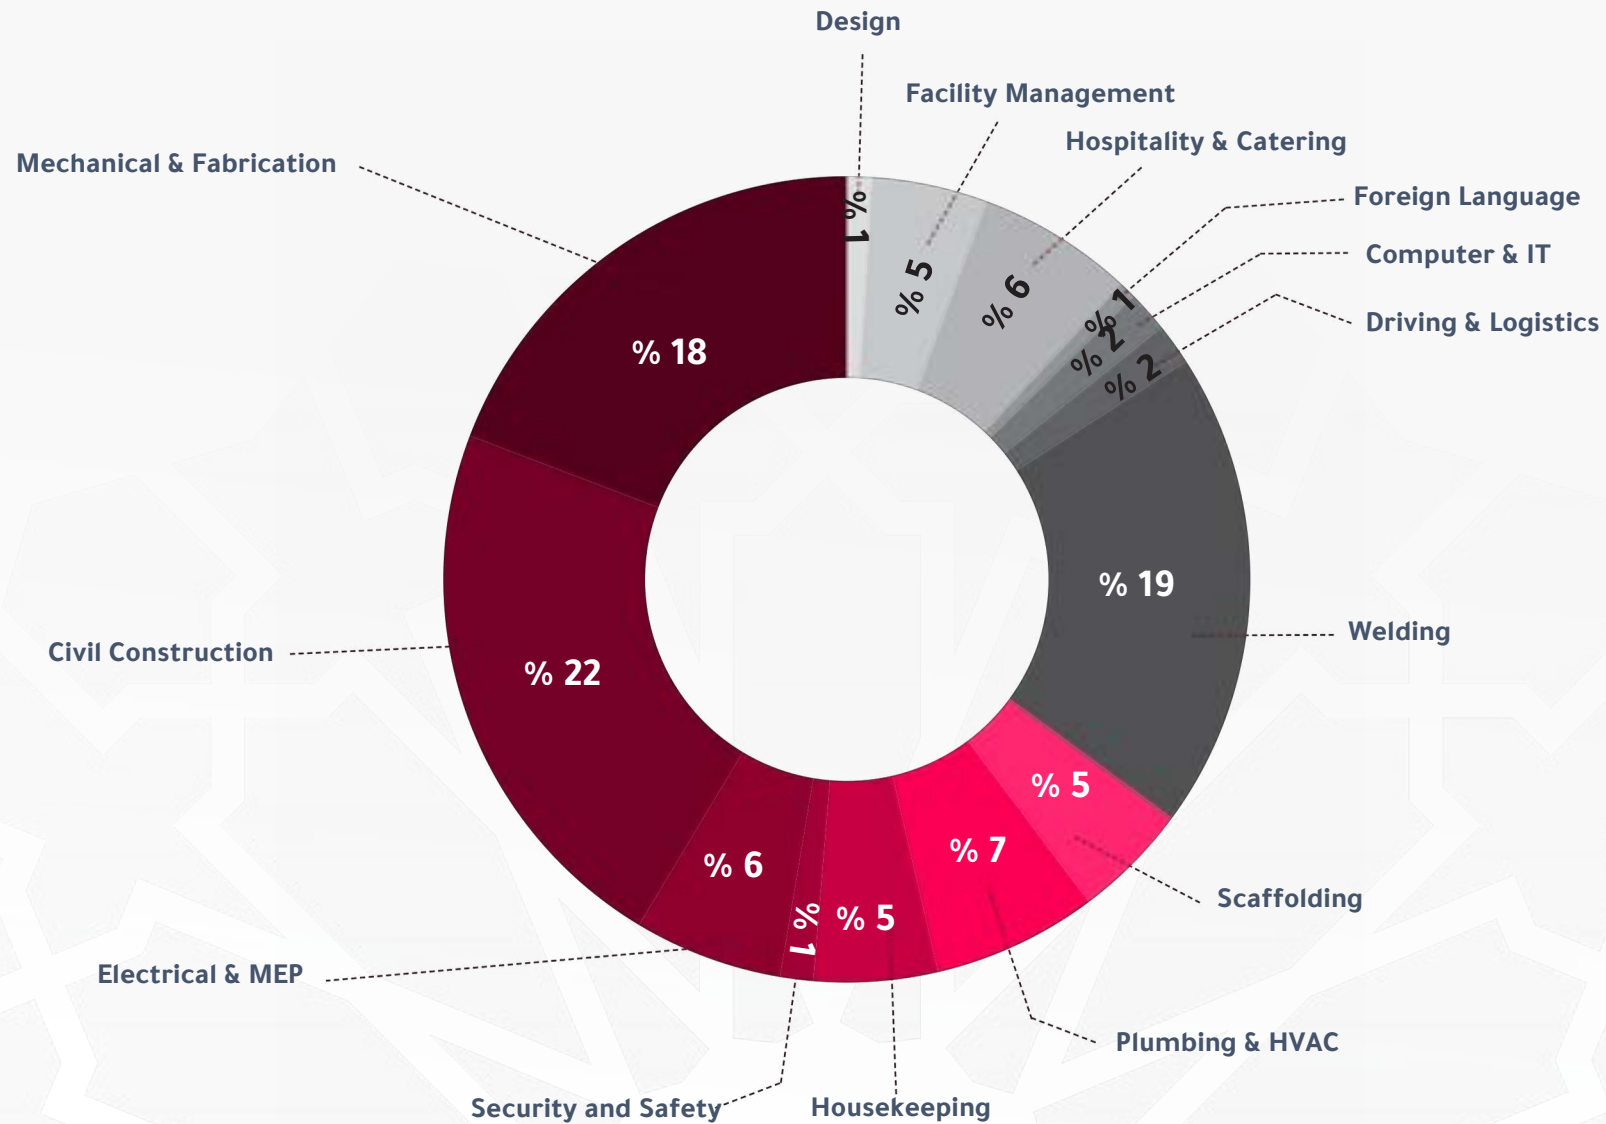

Link trained and assessed candidates with employers, recruitment partners and international opportunities.

05 – SELECT

Facilitate employer interviews, candidate evaluation and selection based on skills and job requirements.

06 – DEPLOY

Support the transition from skills to employment, preparing qualified professionals for real workplace opportunities.
